- **AI / ML** - 1 Month - Pride Institute of Step at Ludhiana
- **Cyber Security** - 6 Month - Pride Institute of Ludhiana

MY PROJECT

Web Project:

Tech Stack: React JS, Bootstarp, HTML, CSS

- This is a basic clone project with features similar to YouTube.
- Users can make video calls and also watch YouTube videos together by sharing the link in the chat (using Web Sockets and JS).
- Users can subscribe to channels. Subscription data is saved, and account info is stored.
- There is a section that shows channels based on the user's interests.
- It also includes features like watch history, video categories, comments, likes
